PREMIUM QUALITY PLASTIC BAG CATALOG

NEW PRODUCTS

Autobag Style Bags - White Front/Clear Back	22
Custom Bag Options	16, 17
Lip and Tape Mailing Bags	23, 27
Postal Approved Poly Bags	23, 27
Polypropylene Bags	22

OUR PROMISE:

TOP QUALITY, UNPARALLELED SERVICE, FLEXIBLE PRICING

ISO 9001:2000 QUALITY

Our line of premium plastic bags is manufactured to meet rigorous ISO 9001:2000 quality standards and offer consistent thickness, clarity, seals and durability. Choose from our complete line of bags with confidence that the superior products you receive today will be the same high quality the next time you order.

PROMPT CUSTOM CAPABILITIES

In addition to our stock offerings, we are your most reliable access to custom sizes and products. Our lead times on special orders will surprise you.

See page 16-17 for more information.

UNRIVALED AVAILABILITY

Every item in this catalog is in stock. We fill your orders quickly and efficiently by relying on a national distribution network.

TABLE OF CONTENTS

BAGS

Anti-Static	18-20
Auto Style Bags	
white front/clear back	22
Bubble-Out Clear Bags	23
Furniture Covers	11, 21
Gaylord/Bin Liners	10, 29
Gusseted Bags	9-10
Gusseted Bags on Rolls	10
Lay Flat Bags	4-8
Lay Flat Bags on Rolls	11
Mattress Bags	11, 22
Part Bags	7

ISO 9001:2000 QUALITY MANUFACTURING

QUALITY PRODUCTS START WITH STATE-OF-THE-ART MANUFACTURING.

To insure the highest quality product at competitive prices, we utilize superior raw materials, sophisticated machinery, strict quality control and dedicated employees—around the clock, seven-days-a-week.

Our manufacturing process, called in-line production because of the continuous flow between the extrusion of film and the making of bags, is the most efficient and economical production method in use today.

RESIN

Thousands of pounds of virgin polyethylene are conveyed hourly from fifteen huge indoor silos to our blown-film lines. Our large resin inventories and long-standing vendor relationships ensure reliable access to the best grades of material, and protect our customers from pricing spikes at the whole-sale level.

QUALITY CONTROL

Film size and quality are monitored continuously. Sample bags from each box are measured and seals are tested. Every carton is weighed, recorded, inspected and stamped for quality assurance.

OPTIMUM RATIOS

Twenty extruders with barrel sizes from 1 to 6 inches diameter, dies from 2 to 28 inches diameter, and towers up to 40 feet high provide the proper mixing, blow-up ratio and cooling to ensure optimum film properties at close tolerances.

WINDING OR SEPARATING

Continuous tubing, sheeting, or sealed and serrated bags are wound on rolls or separated and packaged in 200 lb. test cartons.

EXTRUSION

Resin pellets are fed into one of 20 blown-film extrusion lines, which produce film and bags from 4 to 130 inches wide in a range of thicknesses, configurations and colors. The pellets are melted, compressed, and pushed through a circular die. The hot plastic is then blown into a bubble that is two to three times the diameter of the die. This die-to-bubble ratio ensures that the finished product has maximum clarity and strength. for added integrity.

BAG-MAKING

As the bubble climbs the height of the tower, it cools, and its integrity and configuration are set. When it turns over the nip rolls at the peak of the tower, the bubble is flattened into film, or tubing. High-speed, in-line bag-making machines seal and serrate the film to the specified lengths. All larger bottom-seal bags, including trash liners, are double-sealed for added integrity and strength.

BAG MATERIAL AND DIMENSIONS

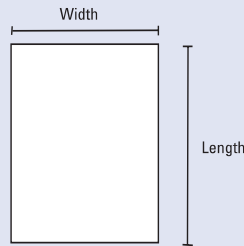

LOW DENSITY POLYETHYLENE

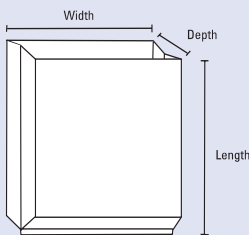

Polyethylene (PE) is the material used over half of all films today, and low density polyethylene (LDPE) is the source of most poly bags. All of our stock bags on pages 4-13 are manufactured with LDPE for its great tensile strength, clarity, flexibility and water barrier properties. It is also resistant to most caustic compounds.

LAYFLAT DIMENSIONS

For each layflat bag, there are three dimensions. The first measurement is the width across the opening of the bag. The length runs from the bag opening to the base of the bag. Gauge, the third figure in a bag's dimensions, is a measure of its thickness expressed in mils. In this catalog, you will find mil thicknesses listed in bold above the columns.

GUSSETED DIMENSIONS

The width measures across the opening of the bag. The depth is the fully extended gusset. The length runs from the opening to the bottom, and the final dimension is the gauge (thickness).

CHOOSING THE RIGHT MIL THICKNESS

- ◆ Lightweight 1 or 1.25 mil bags are perfect for economical packaging and coverage of light weight products.
- ◆ 1.5 and 2 mil bags are the most commonly used thicknesses for storing, shipping, or displaying everyday items.
- ◆ Heavy duty 3 mil and extra-heavy 4 mil bags are capable of protecting and supporting heavy and abrasive items.
- ◆ 6 mil bags are our toughest bags, offering total protection for the heaviest products.

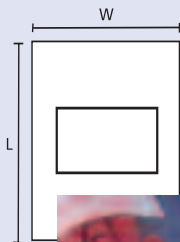

INSPECTING BAG GAUGE

Our bags are manufactured under the most controlled tolerances. When inspecting a bag keep in mind the polyethylene is a flexible material, and gauge can only be measured accurately with a poly micrometer. Machine micrometers, intended for less delicate materials, pinch and flatten bags or film. As gauge

will vary across the width of any bag, ask your salesperson for the appropriate weight of each case to be sure your bags are within tolerances.

MARKABLE BAGS

Parts bags, and bags with white block for marking, and ideal for organizing and displaying products. Three mil bags can handle even the toughest parts.

*Standard Pallet Top Cover and Bin Liner Sizes.

The width measures across the opening of the bag. The depth is the fully extended gusset. The length runs from the opening to the bottom, and the final dimension is the gauge (thickness).

Flat Bags on Rolls

Our low density polyethylene bags on a roll are exceptionally clear, providing protection and high visibility for your products. Bottom sealed for extra strength.

Sheets on Rolls/ Pallet Top Sheeting

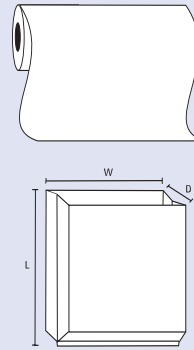

Precut sheets tear off rolls for ease of use in many applications. Use as drop cloths, pallet top covers, and dust covers. Fold may occur on either side of roll.

FITTING BAGS TO CONTAINER:

FITTING A ROUND CONTAINER

- (1) For circumference of the bag, multiply the diameter of the container by 3.14. Divide by 2 to get the flat width. Add 1 in. for a looser fit.

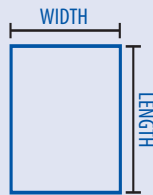

- (2) Add 1/2 of the diameter to the height of the container. Add 5 in. to this total for overhang. This is the total length of the bag needed.

- (3) If tying bag, add 1/2 the diameter to the bag length determined by step #2.

FITTING A SQUARE OR RECTANGULAR CONTAINER

- (1) Add the width and length of the sides. Add 2 in. for a looser fit. This total equals the flat width of the bag needed.

- (2) Add 1/2 of the shortest side to the height of the container. Add 5 in. to this value for overhang. This equals the length of the bag.

- (3) If tying bag, rather than lining a box, add 1/2 length of the shortest side to the bag length determined by step #2.

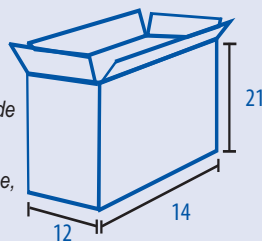

EXAMPLE FOR RECTANGULAR CONTAINER

To line a carton 14(L) x 12(W) x 21 (H)

- (1) Bag width = $L + W + 2$
or $28 = 14 + 12 + 2$

- (2) Bag length = $h + 1/2 \text{ shortest side} + 5"$ or $32 = 21 + 6 + 5$

The ideal bag is 28 x 32 x Gauge, or 16 x 12 x 32 x Gauge

Octene Linear Low Density Liners

These liners are produced from Octene Linear Low Density (LLDPE) material, the highest grade of LLDPE available for liners. This premium raw material yields a vastly stronger product. See the panel to the left for more information about Fitting Bags to Containers.

High Density Polyethylene Trash Bags

High density bags are made from a thinner gauge material to help lower bag and freight costs and reduce storage requirements. Our star seal design provides terrific strength and reduces breakage.

Low Density Liners and Compactor Bags

Ideal for rigorous applications, these bags are perfect when nothing else stands up. Constructed from a heavy gauge low density plastic, these liners resist breakage and puncturing under serious demands.

For Gaylord/Bin Liners see page 29.

MEASURING

Zipper bags are measured by inside dimensions, without the zipper or lip included.

Minigrip® *RECLOSABLE BAGS*
Follow the color line to quality.

Minigrip created the zipper closure. The signature red line along the top of the bag still identifies the best reclosable bag in the industry. Minigrip bags meet FDA and USDA specifications, and employ a reinforced side-welded zipper to lock in a single, smooth motion. These bags are durable enough to be used many times.

Minigrip® *RECLOSABLE BAGS*
Follow the color line to quality.

MATERIALS:

- ◆ LDPE (Liner, Clarity)
- ◆ LLDPE (Hexene, Octene)
- ◆ Fractional Melt
- ◆ Metallocene
- ◆ Clear Anti-Static LDPE
- ◆ Pink Anti-Static LDPE
- ◆ Black Conductive LDPE
- ◆ Amine Free Pink Anti-Static LDPE
- ◆ EVA
- ◆ UVI
- ◆ VCI
- ◆ Low Slip
- ◆ Shrink

COLORS:

Choose from 14 colors in Opaque or Tinted

ISO 9001:2000 QUALITY:

Our line of premium plastic bags is manufactured to meet rigorous ISO 9001:2000 quality standards and offer consistent thickness, clarity, seals and durability. Choose from our complete line of bags with confidence that the superior products you receive today will be the same high quality the next time you order.

ADDITIONAL FEATURES:

- ◆ Made in the USA
- ◆ 100% Recyclable
- ◆ Exceptional clarity
- ◆ Superior strength
- ◆ Durable seals and welds
- ◆ FDA Compliant materials

FREE CUSTOM LABELING:

Our 3" x 5" high quality thermal labels can be customized with bar codes, part numbers and order specific comments up to 50 characters.

Custom Orders
filled in 6-10 days.

Low minimums
even on big bags.

18 GUIDE TO STATIC CONTROL PRODUCTS

AMINE FREE PINK ANTI-STATIC NEW

These bags provide anti-static protection with a negligible presence of amines when compared with traditional pink anti-static. They function in low relative humidity, so they don't need to draw as much moisture from the air to be effective against static charges, and they won't corrode polycarbonate surfaces.

- ◆ Has a surface resistivity of less than 1×10^{12} ohms/sq.
- ◆ Four and six mil products meet the full static decay requirements of MIL-PRF-81705D, Type II and EIA-541.
- ◆ Produced under strict ISO 9001:2000 manufacturing guidelines.

PINK ANTI-STATIC

The traditional protective film for packaging static sensitive and non-static sensitive components where electrostatic contamination is a problem.

- ◆ Has a surface resistivity of less than 1×10^{12} ohms/sq.
- ◆ Meets the full static decay requirements of MIL-PRF-81705D, Type II and EIA-541.
- ◆ Produced under strict ISO 9001:2000 manufacturing guidelines.

BLACK CONDUCTIVE

These bags and film are produced with a carbon black additive to provide protection for sensitive electronic devices or to line containers where explosive materials are stored. Unlike traditional and non-amine films, black conductive films are humidity independent, so they require no humidity to remain effective. They also offer a virtually unlimited shelf life and excellent corrosion resistance, and will not contaminate products with which they come in contact.

- ◆ Has a surface resistivity of less than 1000 ohms/s and a volum resistivity of less than 300 ohms/cm.
- ◆ Meet the full static decay requirements of MIL-PRF-81705D, Type II and EIA-541.
- ◆ Produced under strict ISO 9001:2000 manufacturing guidelines.

TRANSPARENT METALLIC STATIC SHIELDING BAGS

Total Faraday Cage protection and visibility for highly sensitive electronic components. Guard against static charge from both inside and outside with three layers of anti-static protection. 50% transparent for easy product identification. This bag is buried metal construction; a conductive aluminum shield layer is buried between 2 static dissipative polymeric plastic layers.

- ◆ Contains no amines, amides or N-Octanoic acid.
- ◆ Polycarbonate safe.
- ◆ Static shielding notice is stamped in yellow on each bag.
- ◆ Meets the electrical and physical requirements of MIL-PRF-81705D Type III.
- ◆ Also offered in reusable Zip Top style.

AMERICAN MADE

The vast majority of the LDPE and LLDPE bags we offer and all Static Control products are manufactured in the United States and warehoused in locations all over the country. Where market demands require that we offer imported products, we are always eager to provide a quote on a domestically manufactured alternative.

RECYCLING

All of our LDPE and LLDPE bags are recyclable. To find out whether your recycling plant accepts low density bags, look for the national recycling symbol encircling the number 4. Number 4 is the society of plastics Industry code for LDPE (Low Density Polyethylene).

FDA COMPLIANT

All of our stock LDPE and LLDPE bags are manufactured using FDA compliant resin. Our stock bags and film are manufactured using exclusively virgin polyethylene, no reprocessed or scrap resins. The lot numbers and special marking on our cases allow us to document the purity of the raw materials selected. The

quality of resin also ensures an exceptional finished product with regard to clarity, strength, and economy.

With **over 25 years of industry experience**, MidSouth Packaging offers a **wide range of products** to meet the most demanding requirements of today's **flexible packaging** and **specialty barrier needs**.

Our goal is to provide the perfect solution to each customer's requirements. We are committed to meeting that goal through understanding our customer's needs, providing unparalleled customer service, and fulfilling those needs with the most cost-effective, highest quality products available.

Through custom shapes, sizes and fitments to meet your special requirements, we are committed to our partnerships with our customers and suppliers to develop new products and improve existing product lines. If you are unable to locate your product or market above, please contact us directly at **901-276-0646**.

MidSouth
PACKAGING INC.

COMMITTED TO EXCELLENCE

From narrow- to wide-width capabilities, MidSouth Packaging offers an extensive line of products for many markets.

PRODUCTS & MARKETS

- **Military**
 - Bags, rolls, covers and tubing
 - Miscellaneous volatile corrosion inhibitors
 - Pouches
 - Static control products
 - Desiccant and humidity indicators
 - Fiberboard sheets, boxes and cartons
 - Masking, paper reinforced, pressure-sensitive and plastic tape
- **Industrial**
 - Industrial wraps (steel, lumber, interleavers)
 - Paper mill (roll wrap, headers)
 - Building products (EPS insulation facer, OSB facer)
 - Transportation (dunnage bags)
 - Chemicals
 - Small parts
- **Additional Products**
 - Food & snack
 - Medical
 - Pharmaceutical
 - Electronics
 - Powders
 - Meat packaging (freezer paper, butcher paper and bacon board)
 - Ice bags
 - Multi-wall bags (pet food, fertilizer, cement, chemicals, flour)
 - Packaging (tape, box liners)
 - Release liners (silicone, PP, PE, base stock)

ROLL STOCK & POUCHES

- Vacuum bags
- Paper/Foil/Poly
- Film/Foil/Poly (PET, Met PET, nylon, and combinations)
- Paper/Poly
- Paper bags
- Custom handmade
- Tubing
- Die cut items

SPECIAL POUCH FEATURES

- Tear notches
- Zippers
- Multi-pockets
- Tubing
- Lips
- Shrouds
- Export covers

Our mission is to provide the perfect solution

for our customers' specialty barrier and flexible packaging needs.

MidSouth Packaging's commitment is to accomplish that mission

while reflecting our corporate culture of **integrity, honesty** and **respect**

in every communication, every transaction, with every customer, every time.
